Ready
for the
world

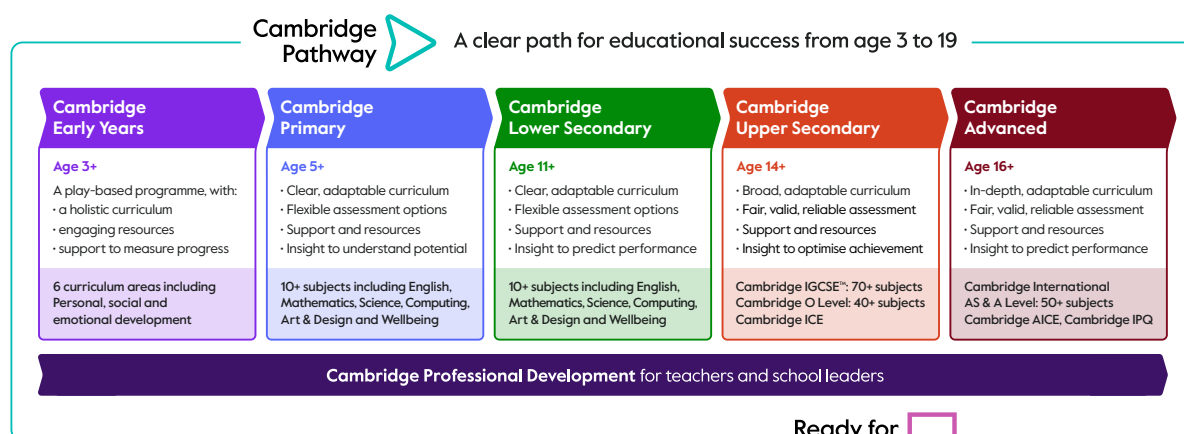

Our world is changing fast. Technological innovation and the impact of climate change are reshaping the world we know today and all our futures.

At Cambridge we work with schools worldwide to build an education that shapes knowledge, understanding and skills to prepare every student for the opportunities and challenges ahead. Together we give learners the confidence they need to thrive and be ready for the world.

From early years to pre-university

The Cambridge Pathway offers five stages of education from age 3 to 19, leading seamlessly from early years to pre-university. Each stage builds on the previous and further shapes learners' knowledge, understanding and skills.

Cambridge schools can select which stages to offer and choose from a broad range of subjects. This means they can offer a programme of study that will not only meet your child's individual needs, but excite them.

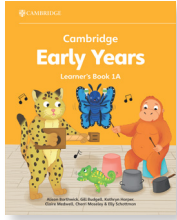

A flexible programme, tailored to meet your child's needs

At Cambridge, we want to help learners develop the skills, learning habits and emotional resilience they need to embrace the opportunities and challenges ahead. Schools can adapt our curriculum, high-quality teaching and learning resources and flexible assessments to their local context.

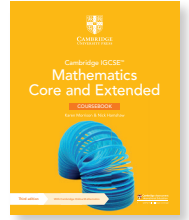

Our education offer helps Cambridge schools support every learner to reach their potential and thrive – by providing additional guidance to build understanding and confidence or offering stretch and challenge.

High-quality resources to keep your child engaged

Our high-quality teaching resources are designed to keep learners of all backgrounds and abilities engaged and developing at pace.

Textbooks and resources use clear language that will help your child understand new and challenging concepts. All our resources are designed to meet the needs of learners who have a home language other than English.

Qualifications that are recognised worldwide

Our qualifications are recognised and valued by the world's top-ranked universities and higher education institutions. Whether your child wants to study locally or in another country, their Cambridge qualifications will open doors to a world of opportunities.

Setting a global standard

With over 160 years' experience in delivering fair, valid and reliable assessments to students worldwide, Cambridge offers a global, recognised performance standard for international education. This means you can be sure that any Cambridge exam your child has taken will provide a true picture of their ability.

A global learning community

With the Cambridge Pathway, your child is joining a global community of learners from more than 10 000 schools in over 160 countries.

By working with our wider community, your child's teachers can connect with other schools to share best practice from different perspectives that can help to shape their knowledge, understanding and skills.

“Taking Cambridge International A Levels was the best decision I ever made for my education. Not only did they grant me significant university credits to start with, they also equipped me with the fundamental knowledge needed for advanced university courses.”

CELINA WU STUDIED CAMBRIDGE INTERNATIONAL A LEVELS AT BINA BANGSA SCHOOL IN INDONESIA. SHE IS NOW MAJORING IN NEUROSCIENCE AT THE UNIVERSITY OF MICHIGAN, USA

“Parents often share how curious and creative their kids have become, that they can’t stop talking about the sessions and how they look forward to their lesson, week after week.”

SNEHLATA ALPHONSO, JBCN INTERNATIONAL SCHOOL, BORIVALI, INDIA

Learning with lasting impact

We recognise that meaningful education is more than just building subject knowledge and conceptual understanding. To thrive in life, learners must also develop a broad range of skills, values, attitudes and behaviours.

When developing our programmes, assessments and resources, we build in plenty of opportunities to help your child become a reflective and innovative learner with the confidence to embrace new information, ideas and challenges.

Responsible and respectful of others, they are engaged intellectually and socially – ready to make a positive impact.

With these attributes, Cambridge learners are ready for the world.

Developing student voices on climate change

Together with our Cambridge community, we are raising the profile of climate change education and developing our teaching, learning and assessment programmes to best equip students to respond creatively to both local and global climate challenges.

For example, we are embedding climate change education across the Cambridge Pathway. In our new Cambridge Early Years programme, the topic of ‘Understanding our world’ instils a sense of care for the environment.

Our Cambridge Global Perspectives™ curricula for ages 5 to 19 enable learners to develop and apply a range of transferable skills in the context of key global issues: analysis, collaboration, communication, evaluation, reflection and research.
